---

## ADDITIONAL INFORMATION

Always test before work, Apply liberally with a brush

Product will need to be left on the surface between 30 to 45 minutes before removing.

Remove after required time with a scraper or a stainless steel scouring ball. Do not use wire wool as this will cause rust to penetrate into wooden surfaces.

If required, apply a further coat and repeat.

Once the surface has completely dried out, wash off any residue with a damp cloth or water.

Use sandpaper to remove any small traces of finish.
